

# The AI Safety Fund Capital Equipment Expenses Policy

## OVERVIEW:

AISF grants do not cover expenses related to the purchase of capital equipment. This includes, but is not limited to, items such as machinery, vehicles, computers, and other long-term assets.

If the proposed project or budget includes such capital expenditures, we request that the budget is revised to exclude capital equipment costs, and if necessary, include alternative funding sources or cost-effective solutions for these expenses.

## COMPLIANCE:

All recipients of the AISF must adhere to this policy. Non-compliance may result in funding reductions, requirement of cost reimbursements, or termination of the grant.

## REPORTING AND DOCUMENTATION:

Recipients are required to provide detailed accounting records to demonstrate compliance with the capital expense policy. Records should clearly segregate costs and must be made available for review upon request.

## EFFECTIVE DATE:

This policy is effective for all projects funded under the first round of solicited grants by the AISF and will remain in effect until further notice.
